

LINEA

Clean design meets the latest in comfort technology

The Linea radiator utilises the latest technology to heat the room quickly and adds a contemporary feel to the room.

The Linea Radiator by DeLonghi

The Linea radiator combines a modern, clean look with DeLonghi's PHD technology. In PHD (preferential heat diffusion) radiators, the heat is delivered to the front panel first, allowing the radiator to warm the room faster than a typical radiator, which heats up the front and back panels evenly.

The Linea's flat design suits both commercial and modern residential projects equally well. Like all DeLonghi radiators, the Linea comes with a 25-year guarantee.

Available Models

The Linea is available by indent order only. As such, we can import the exact size required for your project direct from the manufacturing plant in Italy.

The Linea is available in heights ranging from 300 to 900mm and lengths from 400 to 3000mm. The Linea is available with the 10, 20, 21, 22 and 33 style panel configurations. Its output ranges from 100 to 7000W. The size and panel configurations of the radiator are determined by output requirements and the space available.
